

CLASSIC. MOUNTAIN. MODERN.

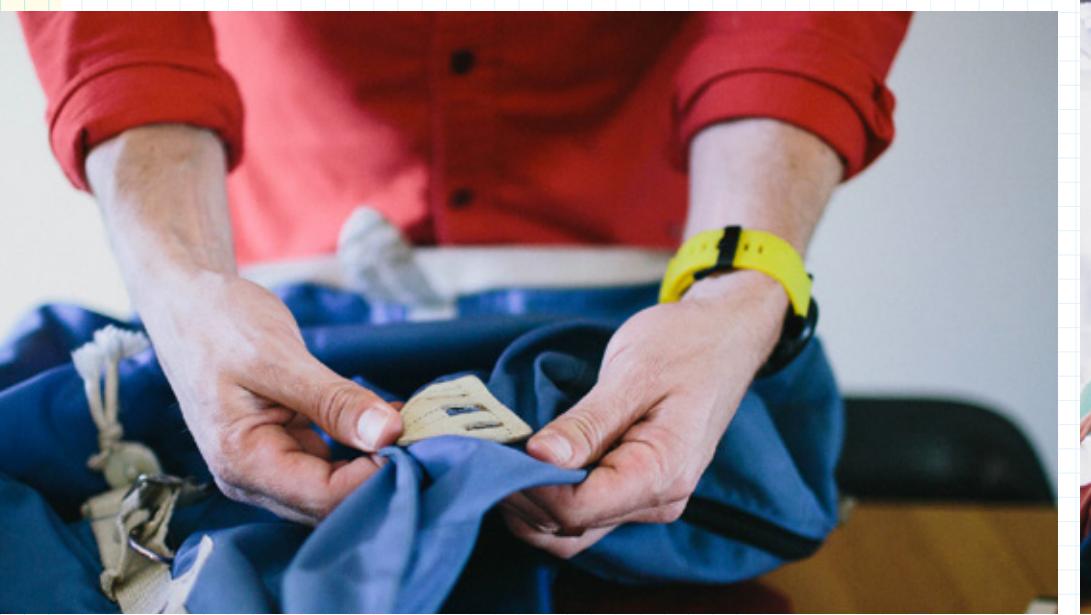

CLASSIC. MOUNTAIN. MODERN.

Here at Topo Designs, we strive for contradiction. We are rooted in mountain culture and outdoor living, but also love exploring cities and traveling the globe. We look to proven classics for inspiration, yet we take advantage of new technologies and innovations to ensure our products have a timeless look with modern functionality. Our products are uncomplicated and utilitarian, but also have an overarching sense of design and style through their simplicity. Our end goal is to not have to choose a single path—we want to live on both sides of the fence, where life is always greener.

COLORADO, USA

OUR ROOTS

Growing up in the west, we have always been interested in not only spending time outside, but also in the gear needed to get out. About 10 years ago, we found ourselves wishing there was a company offering a lineup a bit more like the gear we grew up using—classic styling, functionality, durability and a clear connection with the brand behind the product. So in 2008, we bought a sewing machine and began conceiving, designing, and sewing packs in our basement, while looking for resources and partners that we needed to build our designs. We were lucky enough to find local Colorado folks that were just getting started like us and were willing to build our companies together. We worked with them to produce Topo Designs' initial offering of products and continue to work with them to this day.

Today, we're still in the mode of making things that we want to use as individuals and connecting with our customers as a brand. We want to produce the most durable, versatile, beautiful products that can be used around town, out on the trail and traveling the globe. We know nothing is more frustrating than being let down by your own gear, so that motivates us to make things that last. Simple, classic, well-designed products that are inspired by who we are and where we live.

MANUFACTURING

We really like people who are good at what they do. "Talent" is often reserved for a set of people that perform in public or create great works of art. At Topo Designs, we tend to reserve that term for those magical few that have a gift for creating products that are not only bulletproof, but so skillfully crafted that they end up being hard working utilitarian masterpieces. We search long and hard for the people who possess that level of talent to partner with helping us build our line. Whether we are making classic packs in Colorado or technical shells in Vietnam, our partners are the most talented people on the globe, period.

REPAIRS

One of the best parts of building products that last is that they become a part of the people that own them. They become world travel companions, daily pack mules for their most prized possessions, and second skins to keep them protected from the elements. They not only build a relationship with their owners, but tend to be used so much they suffer from a bit of tough love. We get it, we have our favorites as well and instead of replacing them, we just want to get them nursed to health and back in action. Our repairs program is focused on creating a rehab center for those well-loved pieces so they can stay in the family and as a result, reduce the number of pieces that are unnecessarily discarded for something new.

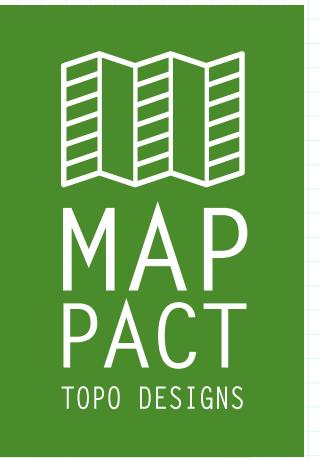

LIFETIME WARRANTY

Our main goal at Topo Designs is to build products that stand the test of time and work anywhere on the map. We want to build fewer things that can be combined in endless ways to work in any environment. Whether traveling the globe or headed to the backcountry, we want to make sure everything we make will go out and come back in one piece, year after year. We use the highest quality fabrics, hardware and materials, and overbuild everything we make. We stand behind it all with our lifetime warranty: We will repair or replace any Topo Designs product that may encounter an issue down the road.

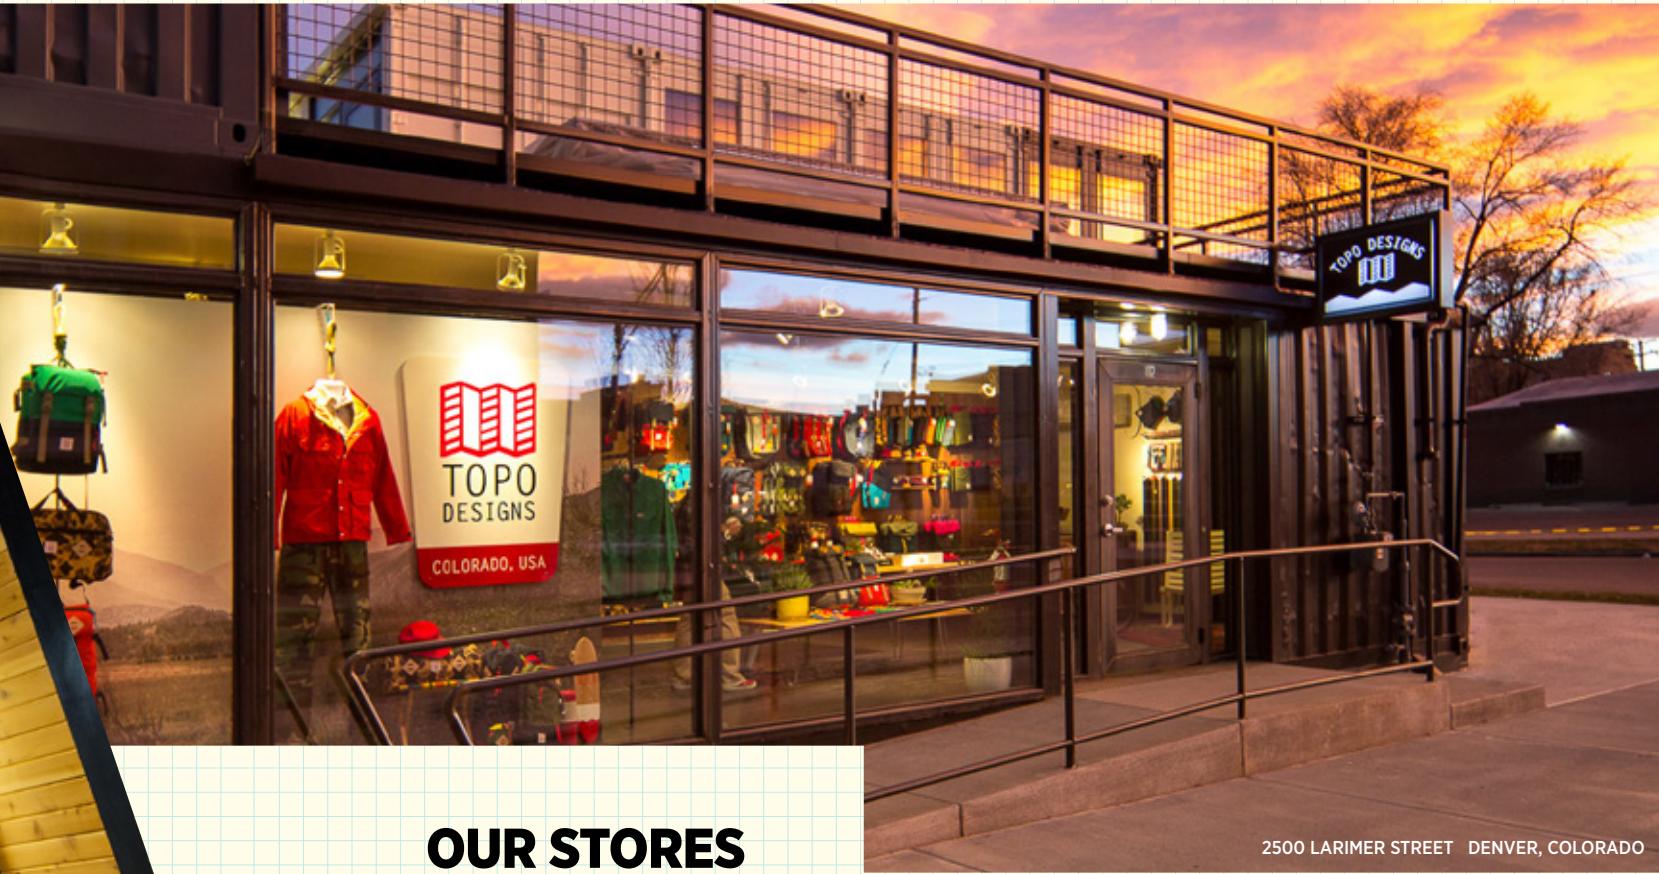

MAP PACT: MAINTAIN, ACT, PROTECT

The Topo Designs MAP Pact initiative is designed to ensure the simple concept to maintain, act, and protect our most valued places. The core starts with who we are as employees and individuals, and how we choose to maintain our environment. We act on decisions to be responsible in the materials we choose, the products we make, and the lifetime warranty we offer. We have developed a simple recipe to implement and share how to protect our most valued places. By allowing people to engage and improve their communities, natural places and spaces around where they live, they immediately see a real change, can easily recruit others and will be more likely to act in the future to protect the important places on their map.

OUR STORES

Our four retail locations offer a fully immersed customer experience for fans of Topo Designs, as well as serving as a mouthpiece for the brand and engagement with new audiences. Our first store opened up in the Denver art district within a repurposed shipping container development in 2013. Since then we have opened Fort Collins,

Boulder, and San Francisco locations all with cohesive yet unique in-store experiences. All of our stores are built to showcase our products and radiate the Topo Designs brand with unique store events, merging all things art, design, outdoors and building stronger ties within our respective communities.

COLLABORATIONS

We enjoy working with friends, both old and new. Our collaborative spirit has allowed us to reach undiscovered audiences, as well as speak to our core base with new offerings and unique stories to tell. We like to have both parties come to the table with something to offer, with the end result being a deeper and more fulfilling story about our relationship and why we're working together.

DESIGN

It's in our name for a reason. Everything we do—every snap, button, shank, rivet, zipper, paracord loop, double-layer, triple-stitch, cover stitch, lock stitch, pattern, fabric swatch, cinch cord, bartack, gusset, lining, pocket, cuff, collar, brim, buckle, sleeve, hem, yoke, pull tab, storm flap, thread color,

lab dip, belt loop, vent, care label, pleat, dart, zip pull and lash tab is the result of (many) conscious design decisions. Our attention to detail and design is what makes our products durable, functional, versatile and able to fit into your everyday life with ease.

CINCH TOTE

Whether it's the local farmer's market, a trip to the beach, or just a place to stash your stuff as you cruise around town, our Cinch Tote is right there with you. With its durable 1000D Cordura® exterior, it'll hold up to café floors, city buses and being tossed in the trunk. Fully-lined with nylon pack cloth, the tote has a cinch top that allows you to secure your items inside, or leave it down for easy access. The shoulder strap can be removed if you don't need it. On the outside, we added four deep exterior pockets to keep your keys, grocery list, magazines and water bottle organized.

TRAVEL BAG 40L

We're out and about every chance we get, so it only makes sense that we make a bag that is welcome on all our adventures. We want something that will work on a trip that lasts a few days or one that will last forever. Our Travel Bag 40L is the antithesis of the usual "brick on wheels." It's a run for the bus, jump on a plane, globe-trotting travel companion. We made it big enough to hold everything you need, but still compact enough to pass as a carry-on. Designed for flexibility, the Travel Bag works with many of our other packs and bags as a modular carry system to streamline cumbersome travel.

MATERIALS

1000D exterior, 400D coated pack cloth liner

DIMENSIONS

16" w x 23" h x 11" d

TRAVEL BAG 30L

You don't always need a large bag when traveling. For those shorter trips (or those amazing packers out there), we have a smaller version of our iconic Travel Bag, built with the same features and functionality as our 40L version. Our Travel Bag 30L is equipped with a sleeve to allow for easy attachment to a roller suitcase handle while breezing through the concourse. We made it big enough to hold the things you need the most, but still compact enough to pass as a carry-on. Designed for flexibility, the Travel Bag works with many of our other packs and bags as a modular carry system to streamline cumbersome travel.

TRIP PACK

Our Trip Pack was born out of the desire to have the perfect sized bag for day trips while traveling, tucking necessities under the seat of a plane, or just carrying a few things around town. With all the functionality of our Daypack, the compact size keeps all essentials organized. We included an external zippered diagonal pocket for quick access to your phone, keys, or snacks. It also works as a system with our Travel Bag by simply hooking the integrated webbing loops to the quick release hooks on the front. The hooks allow both bags to be carried at once and disassembled when you reach your destination.

DOPP KIT

Our Dopp Kit's triangular shape allows it to sit upright on small hotel shelves, providing easy access to everything you need. The size is small enough for the "travel light" crowd, but roomy enough to hold all you'd need to stay looking good on the road. The pack cloth lining is water-resistant, making cleaning a snap. A wrist strap makes it easy to carry even when finding the shared restroom down the hall at night.

PACK BAG

You know the infomercial for vacuum sealed space saving bags? Skip the vacuum. The Pack Bag is a simple, durable and highly functional way to pack down multiple pants, shirts, or socks and under garments into one small space. The inner mesh sleeve gives easy access to smaller items and keeps them from disappearing at the bottom of your luggage. Designed to lay flat, zip wide open and stack neatly inside our Travel Bag, the Pack Bag makes traveling a little bit easier.
